ABOUT US

Tiger Power Systems Pvt Ltd ,is an green energy solution provider established in 2011 to address the growing demand of energy. Holding 12 years of experience, we are towards our milestone of providing affordable, innovative and high quality renewable energy solutions in India. We built a well equipped expert team, who provide a unique solution for all consumer needs.

We bring energy to your life. The TIGER Power Solar is the light of tomorrow. It's affordable, rechargeable and Full maintenance . We are driven by a passion for green energy, and employ creative thinking, professional consulting and on-the-ground experience to provide high quality innovations at affordable prices. We have put our ideas into action in the Indian market, to bring solar home lighting to millions of families who lack electricity access, as well as backup power solutions designed specifically for businesses.

VISION

Empower billions of lives through affordable and innovative energy solutions. Aims on sustainable growth, at a benchmark level through technology and innovations by creating an empowered workforce driven by passion and purpose.

MISSION

Our mission is to be at the forefront of supplying the energy solution. Tiger Power Systems guiding principle is to expand decentralized energy and through:

- Highest return on investment over the life cycle of the project.
- Unrivalled Territorial reach in our sector.
- Localized capabilities.
- Entrepreneurial spirit coupled with rigorous risk management.
